3rd International Symposium on Radionuclide Therapy and Radiopharmaceutical Dosimetry

June 13-17, 2009

The **3rd International Symposium on Radionuclide Therapy and Radiopharmaceutical Dosimetry** will convene **June 13-17, 2009**, in Toronto, Canada, in conjunction with the **2009 SNM Annual Meeting**. Details may be found at: <http://isrtrd2009.labworks.org/>

The 3rd Symposium has been organized by the SNM special committee on Medical Internal Radiation Dose (MIRD), together with representatives of the Dosimetry and Therapy committees of the European Association of Nuclear Medicine (EANM).

The 3rd Symposium follows prior successful international symposia on Radionuclide Therapy and Radiopharmaceutical Dosimetry in Athens (2006) and Helsinki (2004). The 2009 Symposium will blend with SNM tracks in oncology, radiopharmaceutical chemistry, and radiation physics, and radiobiology. The Symposium will highlight current progress in use of **alpha-particle emitters**, continuing a series of previous alpha-emitter workshops.

Symposium topics will include:

- Data collection and quantitative imaging
- Dose modeling and pharmacokinetics
- Clinical dosimetry and treatment planning
- Alpha emitters in cancer therapy
- Auger electron emitters
- Biodistribution studies and biological effects
- Therapy of skeletal metastases and bone pain palliation

To submit an abstract electronically, you must do so by **January 13, 2009** following instructions given at: <http://www.softconference.com/snm/submissions/>. To participate in the Symposium, you must register with SNM to attend the SNM Annual Meeting. No separate Symposium registration will be offered. Registration, housing, local arrangements, transportation, and other logistical arrangements will be handled by SNM. Local arrangement details are available on the SNM website: <http://www.snm.org/>.

We look forward to seeing you in Toronto in 2009!
